TERMS:

NET CASH ON DELIVERY OF GOODS.

In exhibiting the following pages of Designs, Messrs. West & Collier, Ltd. wish it to be understood that they in no way embrace the full extent and variety of their manufactures, but W. & C., Ltd. will be pleased to forward other Illustrations or Sample Chairs if purchasers will state the purpose for which such goods are required.

W. & C., Ltd. do not include carriage in their List of Prices, as they have quoted lowest price for their manufacture, compatible with good workmanship. Neither do they allow for breakage by rail, which must be made on the carrier. Half-price allowed on all packages if returned immediately to Marlow Station, free. All Chairs in the plain wood are sent unpacked at owner's risk, but any chairs can be packed in straw for 1s. per doz. extra, and sent at Company's risk.

W. & C., Ltd. would call special attention to Chairs on pages 32, 33, 34, as being very superior articles, and would take the liberty of always recommending the better-class chairs, especially where intended for permanent use.

W. & C., Ltd., have great pleasure in stating that they are often receiving letters of recommendation from clergy and others, speaking in high terms of their manufactures, and on the next page they give a few unsolicited testimonials and references which they have received.

For Shipping Orders, a great saving in the cost of freight is effected by having the parts fitted and then packed separately in cases, thus taking up much less room. Half amount must accompany order. Special attention is called to page 49 for Patent Chairs for Export.

Estimates given for packages on application.

Any of the Church Chairs can be stained a good Oak colour, varnished, and packed at an extra cost of 6s. per dozen. W. & C., Ltd. would take this opportunity to strongly recommend their Oak Stain and Varnish, as it greatly improves the appearance, and preserves the wood.

Book-shelves can be affixed to any of the Chairs, as shown in sketch No. 9, at 4s. per doz. extra; or as shown in sketch No. 16, at 3s. per doz. extra; or as shown on page 34, at 6s. per doz. extra. We recommend the latter way, as being less liable to damage in transit.
